

An IndeServe Limited On-line Shop

Shop@ IndeServe...

...is IndeServe's newest initiative to further enhance the services that we offer to our customers.

Using a link from the IndeServe Internet Home Page – www.indeserve.co.nz - customers may shop for a very wide range of computer and communications equipment and a raft of other technologies at very competitive prices.

"We are thrilled to be able to extend this service to all of our customers", says Charles Gilmore, Chief Executive of IndeServe Limited. "Our value proposition is to provide 'one place to contact' for technology services that can be delivered promptly, reliably and consistently all over the country. It's what our customers want, and it's something we can do, through our 18 service centres, located in every major city or town in New Zealand. The Internet has always been pivotal to our engagement with our customers who increasingly are using our web service portal, ServicePoint, to request service, monitor WIP and access historical service records". So **SHOP@ INDESERVE** is a logical extension of these well-established methodologies", says Charles. "Being, as we are, responsible for installing and maintaining our customers' technology we are also, increasingly, being asked to supply the products too. This new facility provides a great self-service channel to fast track access the products that conform with your technology environment".

Customers of **SHOP@ INDESERVE** can purchase products using their credit card or, if not already the case, by opening an account with IndeServe, allowing payment of invoices by the 20th of the following month.

Please **TEST DRIVE** the shopping experience. Do it **TODAY!**
